

Job Description

Job Title: Software Engineer

Location: Nuuk, Greenland (Relocation or Remote)

Employment Type: Full-Time

About Us

Unicorns Limited is a leading technology company delivering high-impact, scalable solutions for clients around the globe. From enterprise platforms to data-driven applications, we focus on innovation, reliability, and exceptional user experiences. Our growing team combines technical expertise with a collaborative culture to solve complex problems and deliver meaningful results.

Position Overview

We are seeking a skilled Software Engineer to design, develop, and maintain robust, scalable software solutions. This role offers the opportunity to work on challenging projects in a supportive and growth-focused environment, whether on-site in Nuuk or remotely.

Key Responsibilities

- Design, develop, test, and maintain high-quality software applications using Python, R, Java, and JavaScript.
- Collaborate with cross-functional teams to define technical requirements and deliver innovative solutions.
- Write clean, maintainable, and efficient code following industry best practices.
- Participate in code reviews to ensure quality, performance, and security standards.
- Diagnose and resolve software defects and performance issues.

Required Skills

- Proficiency in Python, R, Java, and JavaScript.
- Experience with frameworks/libraries (React, Node.js, Django, or Spring).
- Solid understanding of SDLC and Agile.
- Strong problem-solving skills and attention to detail.
- Proficiency with version control (Git).

Preferred Skills

- Experience with AWS, Azure, or GCP.
- Knowledge of SQL & NoSQL databases.
- Familiarity with CI/CD pipelines and DevOps.
- Background in data analytics or ML (plus).

Benefits

- Competitive salary + relocation assistance.
- Flexible work (remote/onsite).
- Health & wellness benefits.
- Training & professional development.
- Unique Arctic perks: scenery + northern lights.
